### Who Can Benefit

- ❖ Patients
- ❖ Healthcare providers
- ❖ Researchers
- ❖ Industry representatives
- ❖ Policy-makers
- ❖ *All stakeholders interested in LPLD*

### How it Works

Patients can join the registry to submit their data. After taking web-based surveys, explore the collected information in a way that protects the privacy of everyone.

### Who We Are

The Foundation of the National Lipid Association (FNLA) reviewed the registry survey. As a professional organization, our mission has been to reduce the morbidity and mortality from cardiovascular disease by increasing the understanding of the pathophysiology, and detection and optimal treatment of lipid disorders.

PatientCrossroads pioneered the CONNECT registry platform, which allows patients around the world to join others in reporting their own experience of disease. In use since 2007, our registries collect data from patients for over 350 diseases worldwide for foundations, companies and governments.

### Get Connected.

It takes whole communities to help people living with medical conditions lead healthier and happier lives. The CONNECT LPLD Registry brings together individuals affected by lipoprotein lipase deficiency and professionals involved in their medical care and research.

Join THE CONNECT LPLD Registry to:

- ✓ Learn how other patients manage their health
- ✓ Take surveys and share your experiences in a program that safeguards your privacy
- ✓ Receive information about opportunities to participate in research
- ✓ Help researchers unlock more effective treatments
- ✓ Help healthcare providers better understand LPLD
- ✓ Improve knowledge about patient communities among advocacy groups

The more data we collect about an illness, the closer we can get to helping communities find treatments that work. Your participation is crucial to help reach the goal of developing more effective treatments for LPLD.

Encourage everyone you know to join today!
